Trust the #1 OEM Source for Repair Information

ALLDATA REPAIR is the most comprehensive single source for OEM diagnostic, maintenance and repair information. Manufacturers' data is available on over 20,000 engine-specific vehicles from 1982 to present.

You can access over two million unique automotive repair articles, 1.5 million images and over 150,000 up-to-date Technical Service Bulletins (TSBs) and recalls. And our database is continually growing.

ALLDATA repair information is available online or on DVDs, and is updated quarterly. The online version offers several advantages

at no extra charge. Updates are automatic and thousands of pages are added each year. Online access also eliminates the worry of discs being lost or damaged.

ALLDATA's vast database gives you access to the manufacturers' expertise.

A Profitability Tool

ALLDATA offers new revenue opportunities with built-in vehicle-specific factory maintenance schedules. Cars are expensive, and consumers want to keep their vehicles' resale values high through regularly scheduled maintenance. Today's reliable cars mean that money previously earmarked for repairs can now be used to maintain them according to factory recommendations. ALLDATA's OEM maintenance schedules are imported directly into estimates – complete with parts and labor.

A Customer Retention Tool

Build trust with your customers by letting them know you rely on manufacturers' vehicle-specific information from ALLDATA to keep their cars running safely and efficiently.

“I couldn't get by without ALLDATA. I've used it for over 10 years, and it is rare that I can't find what I need. OEM information is the gold standard. That's especially true for wiring diagrams.”
