

"We needed other-make repair information in a networked environment."

— Pete Hamel, Shop Foreman,
Reliable Pontiac Cadillac, Roseville, California

Shop Foreman Pete Hamel and Technician Jerry Bailey get cars fixed and on the lot faster with ALLDATA Online.

Reliable Pontiac Cadillac's Service Manager, Kevin Coats, knew he wanted the best for his service department. He and his Shop Foreman, Pete Hamel, were looking for a powerful information system to support the used car operation's productivity.

Kevin and Pete chose ALLDATA® Online, accessible to the technicians through state-of-the-art wireless technology. The result? Maximum efficiency.

"We needed other-make repair information in a networked environment," Pete says. "We depend on ALLDATA's wiring diagrams and engine specifications to satisfy our needs for used car repairs, as well as the quick access to tightening specs and fluid capacities. In addition, ALLDATA provides all the information to meet the requirements of being an emissions repair facility."

At Reliable, technicians find what they need in a flash, from any location in the shop. "Quick and easy access to all car lines means we can get vehicles in and out of the repair bays quicker," Pete says, "which means vehicles get on the lot and sell faster."

Kevin and Pete provide their technicians with the best technology for top efficiency. ALLDATA Online provides Reliable Pontiac Cadillac with the industry's best information.
